

Deliverable List

OmegaLand Educator Offered Items

The products and services provided vary by the OmegaLand Educator purchase type (Standalone / Enterprise) and the applications selected, allowing an optimal combination for your training environment and needs.

Purchase Format

"Standalone version" ... The purchased simulator is a product that operates only on one PC, and includes the items required mainly for self-study. As a result, it is not provided with the product maintenance service.

"Enterprise version" ... The purchased simulator is a product that can be used by multiple students at the same time in a network environment and includes not only self-learning but also offerings to conduct group learning with instructor guidance. Also, the product maintenance service is available.

1: System Administrator...A person who plans and manages education curriculum

2: Instructor...A person who is familiar with educational contents and able to teach them

3: Workbooks can be ordered separately through the Workbook Service

4: Only the "Operation Principles" and "Basic Units" series are provided.

5: Except for the Industry series, bound manual can be ordered separately through the Workbook Service.

Services

In OmegaLand Educator, in addition to the simulator software, the following services are also offered so that customers can start education more smoothly.

Workbook Service

OmegaLand Educator workbooks can be purchased to allow instructors to prepare lessons without taking time and effort (creating materials for students) so as to be able to utilize the simulator efficiently. For details, please contact our sales department.

Maintenance Service

The Enterprise version is covered by a maintenance service provided under an Annual Maintenance Contract (AMC). This service includes product version upgrades, product improvements, information about product revisions, and support for inquiries regarding product use.
